Synopsis
Costs and other factors of trip itineraries using Privately Owned Vehicle (POV) or rail are compared for short distance travel to a field office. POV is selected as advantageous. A travel authorization is prepared, and the information is checked for compliance. Errors indicating missing information are identified, and a notification is issued. The travel authorization is revised to resolve the errors. The travel authorization is submitted and routed for approval. Because the traveler's approver is on leave, approval responsibilities are delegated. The travel authorization is reviewed and approved by appropriate officials. After the trip is completed, a travel voucher is prepared, including determining POV and other expenses. The voucher information is checked for compliance with no issues identified. The voucher is submitted, routed, reviewed, and approved by appropriate parties. A payment request is submitted, identifying amounts to be paid to the travel charge card issuer company and the traveler. After payment, an additional expense for parking is identified. An additional voucher is prepared and submitted, including the parking expense. The additional voucher information is checked for compliance with no issues identified. The additional voucher is routed, reviewed, and approved by appropriate parties. A payment request is submitted for the amount to be paid to the traveler.
Assumptions and Dependencies
<u>General FIBF</u> <ol style="list-style-type: none"> 1.1 There is no presumption as to which events are executed by which business actor. 1.2 There is no presumption as to which events are automated, semi-automated, or manual. 1.3 There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities and between provider solutions/systems. 1.4 All predecessor events required to trigger the Initiating Event have been completed. <u>Business Use Case Specific</u> <ol style="list-style-type: none"> 2.1 Travel budget has been established. 2.2 A travel personnel profile has been set up for the traveler. 2.3 Approver delegation authority has been set up. 2.4 A Government contractor-issued individually billed charge card (IBA) has been issued to the traveler. 2.5 Travel location is greater than 50 miles from traveler's official station/residence location. 2.6 Travel is accomplished within the same business day and trip duration is greater than 12 hours. 2.7 Prior to voucher submission, the traveler's designated approver has returned. 2.8 The travel documents associated with the trip are not selected for audit. 2.9 Although a Tax Advantage Card can be used for either CBA or IBA charges, when the traveler submits the TDY Travel Voucher, separate line items will be used and indicate whether each expense is a CBA or IBA expense.

Federal Records Management

- 3.1. The types of digital objects received or created during TRT events (Business Use Case Inputs or Outputs) that are considered TRT Federal records (ERM.010.010, ERM.010.020) are specified with a superscript (FR). TRT Federal records are managed as temporary Federal records unless agency personnel designate a specific TRT federal record as having permanent value because of high dollar value, media attention, historical value, research value, or other extenuating circumstances.
- 3.2. TRT Federal records are retained for a period of 7 years from the TRT event date if the retention period for a specific type of TRT Federal record has not been established in the National Archives General Records Schedules (GRS) (ERM.010.030). If special circumstances occur such as an order, law, or business justification, the temporary Federal record's retention period is changed (ERM.030.040) or the permanent Federal record's retention period is extended (ERM.040.040).
- 3.3. During the retention period of an TRT Federal record: appropriate access levels are maintained (ERM.020.010); associated metadata (e.g., record identifier, creator, creation date, security classification, access rights) and an audit trail of changes to Federal record content, metadata, and access level are maintained (ERM.020.020); if a records hold is placed, the Federal record is locked down until the records hold is lifted to ensure no changes can be made (ERM.020.030); if needed to satisfy a Freedom of Information Act, Congressional, or e-discovery request, the Federal record is made available (ERM.020.040); and if needed because of technology obsolescence, the Federal record is converted to an acceptable format and/or migrated to another repository to serve out its retention period (ERM.020.050).
- 3.4. Once an TRT Federal record has met its records retention period, it is approved for disposal and disposed (ERM.030.010, ERM.030.020, ERM.030.030) or prepared for transfer, transferred to NARA, and removed from the TRT solution (ERM.040.010, ERM.040.020, ERM.040.030).
