2022.1.0	10/3/2022	Updated business standards to submit to BSC and public review	GSA
2024.1.0	6/25/2024	Updated business standards for annual review	GSA

Use Case 100.TRT.L2.02 TDY Travel to Multiple Locations, Segments with Multiple Modes

End-to-End Business Process: 100. Book to Reimburse

Business Scenario(s) Covered

- L2.24 Multiple Travel Modes
- L2.25 Travel with Multiple Segments

Business Actor(s)

Traveler, Approver(s), Travel Management Center (TMC), Finance Office

Synopsis

Travel dates and travel locations are identified for a domestic Temporary Duty (TDY) trip with multiple destinations, travel modes, and segments. The Travel Management Center (TMC) is contacted to research itinerary options for air and rail transportation methods. A rail transportation provider is selected for travel to the first location, and refundable airfare is selected for travel to the second location. Reservations are made by the TMC, and the information is checked for compliance with no issues identified. The reservation and passenger name record (PNR) information is provided with the ticketing date. A travel authorization is prepared, and the information is checked for compliance with no issues identified. The travel authorization is submitted, routed, reviewed and approved by appropriate officials. The air transportation provider ticket is issued on the ticketing date established by the PNR, and the trip itinerary is generated and provided. The out-of-channel rail ticket is purchased, and the ticket is issued by the transportation provider. After the first stop of the trip is completed by rail, the second stop of the trip by air begins. After the trip is completed, a travel voucher is prepared, including taxi or transportation networking company expenses used to travel to and from residence. The voucher information is checked for compliance with no issues identified. The voucher is submitted, routed, reviewed, and approved by appropriate officials. A payment request is submitted, identifying amounts to be paid to the travel charge card company and the traveler.

Assumptions and Dependencies

General FIBF

- 1.1 There is no presumption as to which events are executed by which business actor.
- 1.2 There is no presumption as to which events are automated, semi-automated, or manual.
- 1.3 There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities and between provider solutions/systems.
- 1.4 All predecessor events required to trigger the Initiating Event have been completed.

Business Use Case Specific

- 2.1 Travel budget has been established.
- 2.2 A travel personnel profile has been set up for the traveler.
- 2.3 A Government contractor-issued individually billed charge card (IBA) has been issued to the traveler.
- 2.4 The rail ticket is purchased using the Amtrak Government discount program.
- 2.5 A credit received on the Government contractor-issued centrally billed charge card (CBA) is recorded in a travel card management process.
- 2.6 The travel documents associated with the trip are not selected for audit.
- 2.7 Although a Tax Advantage Card can be used for either CBA or IBA charges, when the traveler submits the TDY Travel Voucher, separate line items will be used and indicate whether each expense is a CBA or IBA expense.

Federal Records Management

- 3.1 In accordance with National Archives General Records Schedules (GRS) and other Federal records management standards, the types of digital objects received or created during TRT events (Business Use Case Inputs or Outputs) that are considered TRT Federal records (ERM.010.010, ERM.010.020) are specified with a superscript (FR).
- 3.2 For each type of TRT Federal record, a retention period is established (ERM.010.030) and, if special circumstances occur such as an order, law, or business justification, a temporary Federal record retention period is changed (ERM.030.040) or a permanent Federal record retention period is extended (ERM.040.040).
- 3.3 During the retention period of a TRT Federal record: appropriate access levels are maintained (ERM.020.010); associated metadata (e.g., record identifier, creator, creation date, security classification, access rights) and an audit trail of changes to Federal record content, metadata, and access level are maintained (ERM.020.020); if a litigation hold is placed, the Federal record is locked down until the litigation hold is lifted to ensure no changes can be made (ERM.020.030); if needed to satisfy a Freedom of Information Act, Congressional, or e-discovery request, the Federal record is made available (ERM.020.040); and if needed because of technology obsolescence, the Federal record is migrated to another repository to serve out its retention period (ERM.020.050).
- 3.4 Once a TRT Federal record has met its record retention period, it is disposed (ERM.030.010, ERM.030.020, ERM.030.030) or transferred to NARA (ERM.040.010, ERM.040.020, ERM.040.030).

Initiating Events	A Government employee is requested to travel to multiple domestic locations for mission support purposes.
