Summary of Updates in this Release	7

Introduction

The Federal Financial Management (FFM) Business Capabilities are part of the Federal Integrated Business Framework (FIBF). In the FFM Functional Area, FIBF Business Capabilities are documented as Federal Financial Management System Requirements (FFMSRs). The FIBF is a model that enables the Federal government to coordinate and document common business needs across agencies, focusing on outcomes, data, and cross-functional end-to-end business processes. FIBF can be used to drive performance discussions and investment decisions, as a model for acquiring and implementing government-wide solutions, and to establish roles and responsibilities for end-to-end process service delivery. In the Federal Financial Management (FFM) Functional Area, the FFM FIBF documents are included in the Financial Management Capability Framework (FMCF) that provides the common set of standards and capabilities that are the foundation for all offerings in the Financial Management (FM) Quality Service Management Office (QSMO) Marketplace.

Refer to the Guide to the FM QSMO Marketplace for a description of each FMCF component and how the components relate to each other.

Background and Purpose

The Federal Financial Management System¹ Requirements implement the Office of Management and Budget (OMB) and the Department of the Treasury (Treasury) objective to help achieve shorter-term, lower-cost, and more incremental financial management system modernization. The requirements are:

- Focused on business rather than technology;
- Neutral to the system solution [shared federal or commercial service, custom commercial off-the-shelf/government off-the-shelf (COTS/GOTS) technology, automated or manual];
- Defined as federal government unique financial management data input, business process, and data output;
- Applicable to both administrative systems as well as program operation systems that perform financial management business processes (that is, mixed systems); and
- Referenced to their federal government authoritative sources.

Organization and Content

The requirements in this document are organized as follows:

- **Function ID and Federal Financial Management System Function:** Identifies and names an activity that groups requirements. The first two digits of the Function ID associate the function with the federal financial management goal it supports (for example, function 1.1.1 supports goal 1.1). These goals are defined in the “Federal Financial Management Improvement Act of 1996 (FFMIA) Compliance Determination Framework” (Table 1 within Appendix D to Circular No. A-123, Compliance with the Federal Financial Management Improvement Act of 1996). Note that Treasury and OMB have determined that budget planning and formulation functions will not be included in the current Federal Financial Management System Requirements; however, the budget execution functions are included.
- **DI-Data Input, P-Process, DO-Data Output:** Classify the requirements as a federal government unique data input (DI), process (P), or data output (DO). Examples of the federal government unique inputs, processes, and outputs are included parenthetically in the requirement statements. Federal government unique requirements comprise:
 - o Data not normally captured by commercial sector financial systems but required by federal statutes, standards, or guidance.
 - o Processes not normally performed or performed differently in the commercial sector compared to the federal government.

¹ A “financial management system” includes an agency’s overall financial operation, reflecting the people, processes, and technology to capture, classify, summarize, and report data in a meaningful manner to support business decisions. It includes hardware, applications and system software, personnel, procedures, data, and reporting functions. The financial management system can be fully integrated with other management information systems (i.e., mixed systems) where transactions automatically flow into an accounting general ledger. The financial management system could also include manual processes to post transactions from other management systems into the accounting general ledger.

- o Data required to be exchanged between federal agencies or reported from agency systems as federal statutes, standards, or guidance requirements.
- **Requirement ID:** Sequentially identifies the requirements in each function.
- **Federal Financial Management System Requirements:** Contain the requirement statement. Application of regulatory guidance [for example, Treasury Financial Manual (Pa), OMB Circular No. A-136] is restricted to the content identified in the “Federal Financial Management System Authoritative Reference” column. Throughout these statements, the phrases “consistent with” and “as specified” are used in association with authoritative source references, as follows:
 - o **Consistent With:** Conveys that as long as the content and meaning of the data/transaction/activity are equivalent to the data/transaction/activity as defined in the authoritative source, the requirement will be considered satisfied.
 - o **As Specified:** Conveys that the content and meaning as well as format of the data/report/transaction must match the specification defined in the authoritative source reference for the requirement to be considered satisfied.
- **Federal Financial Management System Authoritative Reference:** Provides the current federal regulatory authoritative sources that contain additional clarification of business processes and data specifications.

Intended Use

These requirements are used during and after the acquisition and implementation of the Financial Management System solutions:

- During the service/technology acquisition phase, agencies should:
 - o Use these requirements (including the authoritative source references) when developing the technical evaluation criteria for agency requests for proposal;
 - o Require potential providers (e.g., hardware, software, services) to document or demonstrate as part of their response to the request for proposal their ability to meet the technical evaluation criteria developed using these requirements; and
 - o Identify during proposal evaluations the extent to which service/product modifications and/or agency manual processes will be required to fully meet these requirements.
- During the service/technology implementation phase, agencies should:
 - o Use these requirements (including the authoritative source references) when developing federal government system acceptance test plans, scenarios, and scripts;
 - o Use these requirements to drive inter- and intra-agency process and solution standardization;
 - o Rationalize, standardize, and reduce the number of system interfaces currently active in the realm of federal financial management systems;
 - o Evaluate system acceptability based on the combined ability of the service/technology and agency manual processes to fully meet these requirements; and

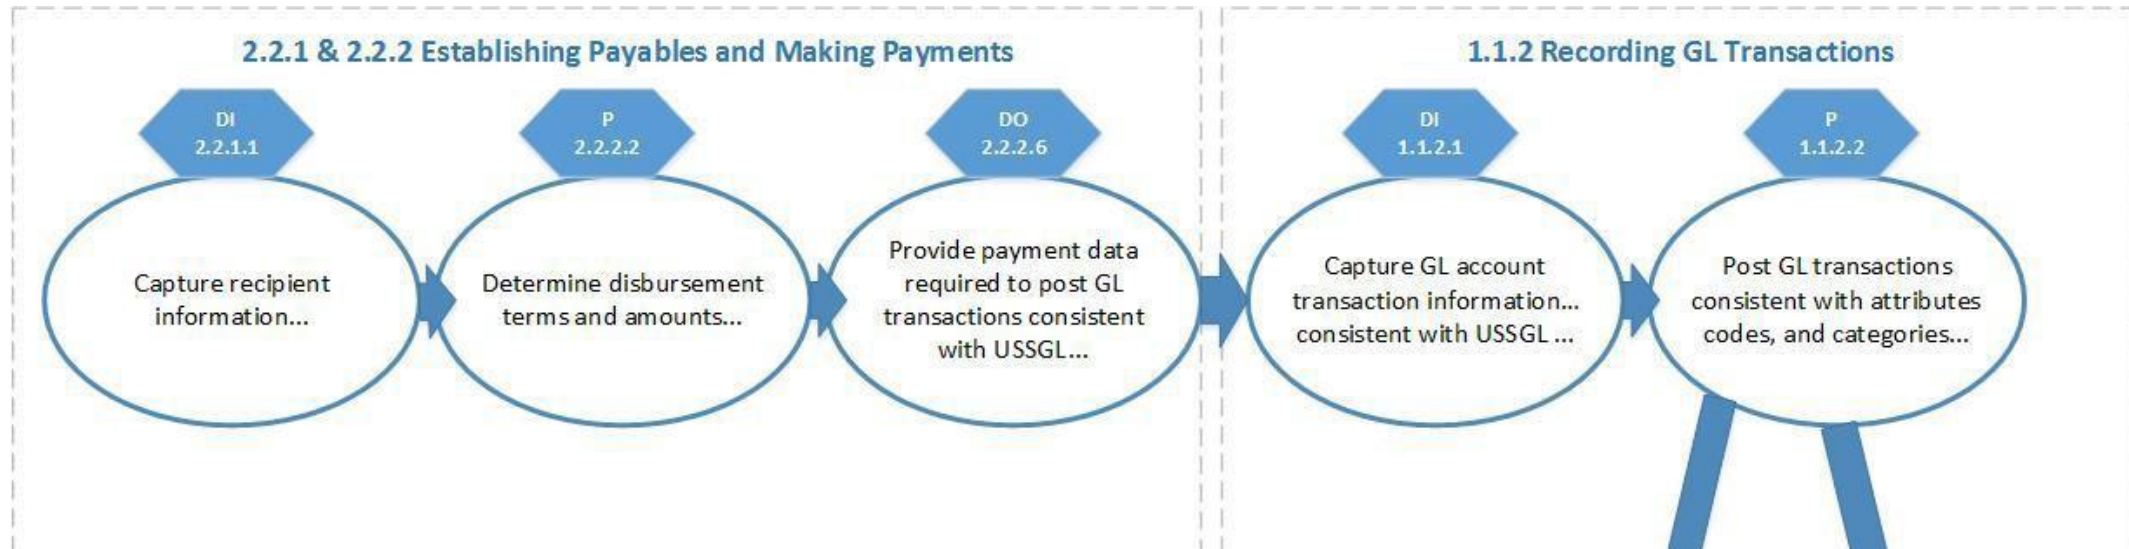

- o Post deployment, evaluate the combined ability of the service/technology and agency manual processes to achieve the federal financial management goals associated with these requirements.
- After the service/technology implementation, agencies should:
 - o Use the federal financial management goals associated with these requirements to periodically evaluate the Financial Management System solution (both service/technology and manual processes); and
 - o If gaps/deficiencies are found in meeting the goals, use these requirements to identify where gaps/deficiencies in the system (service/technology/manual processes) may need to be addressed through further acquisition and/or system enhancements.

Relationships Among Requirements

Each requirement is associated with a business function and is categorized as data input, process, or output. The examples below demonstrate the relationship between requirement categories for selected payment processing requirements:

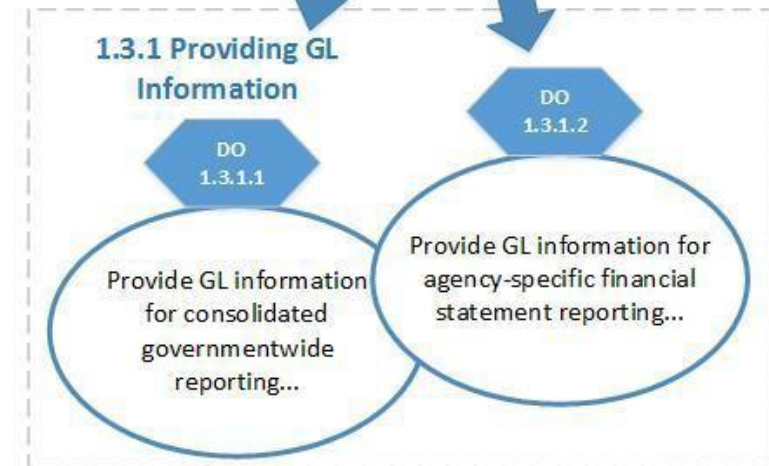

- Each financial management function (for example, payments) captures its required financial management information.
- Some functions execute manual or automated processes to derive additional financial management information.
- Each financial management function provides the data required to post to the General Ledger (GL) function.
- The GL function captures the GL transaction information from the other financial management functions and executes the processes needed to post transactions to the GL.
- Using the information posted to the GL, outputs are generated in the appropriate form and with the appropriate content for distribution to internal and external stakeholders.

Requirements for securing financial management system information are included in this document until the newly designated Standards Setting Agency (SSA) for cybersecurity (CYB) completes development of their Federal Integrated Business Framework (FIBF) Business Capabilities. Similarly, requirements for making federal financial information accessible to persons with disabilities are included in this document until an agency is designated as the SSA for information technology services (ITS).

Additional Examples:

- | | | |
|--------------------------------------|--|---|
| 1.1.3.1 (DI) Capture asset type | 1.1.3.2 (P) Determine asset value | 1.1.3.4 (DO) Provide asset data to GL |
| 1.1.4.1 (DI) Capture liability type | 1.1.4.2 (P) Determine liability value | 1.1.4.3 (DO) Provide liability data to GL |
| 1.1.5.1 (DI) Capture revenue type | 1.1.5.2 (P) Determine revenue classification and value | 1.1.5.4 (DO) Provide revenue and other financing sources data to GL |
| 2.2.4.1 (DI) Capture receivable type | 2.2.4.2 (P) Determine receivable amount | 2.2.4.3 (DO) Provide receivable data to GL |

Summary of Updates in this Release

	Function Changed	Summary of Change	Rationale
All Functions	All FFM Business Capabilities	No changes in content for version 2.0	No Business Standards Council (BSC) feedback was received for the Business Capabilities

Function ID	Federal Financial Management System Function	Requirement ID	DI-Data Input P-Processes DO-Data Output	Federal Financial Management System Requirements	Federal Financial Management System Authoritative Reference
1.1.1	Defining GL Accounts and Attributes	1.1.1.1	DI	Provide GL account classifications (for example, budgetary, assets, liabilities, revenues, and expenses), account categories (for example, receivables), and account subcategories (for example, accounts receivable) consistent with the United States Standard General Ledger (USSGL) accounts defined in the Treasury Financial Manual (TFM).	<ul style="list-style-type: none"> • USSGL, Section I: Chart of Accounts (includes Cover Page); • USSGL, Section II: Accounts and Definitions (includes Cover Page); • TFM Volume I, Part 6, Chapter 2100 Fiscal Service Data Registry.
		1.1.1.2	DI	Provide GL proprietary account attributes (for example, exchange/non-exchange indicator, federal/non-federal indicator, and program indicator) consistent with the USSGL account attributes defined in the TFM.	<ul style="list-style-type: none"> • USSGL, Section IV: Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting; • TFM Volume I, Part 6, Chapter 2100 Fiscal Service Data Registry.

		1.1.1.3	DI	Provide GL budgetary account attributes (for example, Default Budget Enforcement Act Category, Apportionment Category B Program Code, Authority Type Code) consistent with the USSGL attributes defined in the TFM.	<ul style="list-style-type: none"> • USSGL, Section IV: Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting; • TFM Volume I, Part 6, Chapter 2100 Fiscal Service Data Registry.
--	--	---------	----	---	--

Function ID	Federal Financial Management System Function	Requirement ID	DI-Data Input P-Processes DO-Data Output	Federal Financial Management System Requirements	Federal Financial Management System Authoritative Reference
1.1.2	Posting GL Transactions	1.1.2.1	DI	Capture GL account transaction information provided by supporting financial management operations (for example, payments, receipts, liabilities, assets, and reimbursable/intragovernmentals) consistent with the USSGL account attributes, account transaction codes, account transaction categories, and account transaction subcategories defined in the TFM.	<ul style="list-style-type: none"> • USSGL, Section I: Chart of Accounts (includes Cover Page); • USSGL, Section II: Accounts and Definitions (includes Cover Page); • USSGL, Section III: Account Transactions; • USSGL, Section IV: Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting; • TFM Volume I, Part 6, Chapter 2100 Fiscal Service Data Registry.

		1.1.2.2	P	Post GL proprietary, budgetary, and memorandum account transactions consistent with USSGL account attributes, account transaction codes, account transaction categories, and account transaction subcategories as defined in the TFM.	<ul style="list-style-type: none"> ● USSGL, Section I: Chart of Accounts (includes Cover Page); ● USSGL, Section II: Accounts and Definitions (includes Cover Page); ● USSGL, Section III: Account Transactions; ● USSGL, Section IV: Account Attributes for USSGL Proprietary Account and Budgetary Account Reporting; ● TFM Volume I, Part 6, Chapter 2100 Fiscal Service Data Registry.
		1.1.2.3	P	Close non-fiduciary and fiduciary accounts consistent with USSGL account closing table rules as defined in the TFM.	<ul style="list-style-type: none"> ● USSGL, Section III: Account Transactions; ● USSGL, Section VII: GTAS Validations and Edits, Closing Edits Detail Report.

Function ID	Federal Financial Management System Function	Requirement ID	DI-Data Input P-Processes DO-Data Output	Federal Financial Management System Requirements	Federal Financial Management System Authoritative Reference
		1.1.2.4	P	Maintain ability to post transactions funded, obligated, or expended over multiple years to GL accounts that do not close (for example, undelivered orders—obligations, unpaid; delivered orders—obligations, unpaid; authority outlaid not yet disbursed) consistent with the TFM.	<ul style="list-style-type: none"> ● USSGL, Section I: Chart of Accounts (includes Cover Page); ● USSGL, Section II: Accounts and Definitions (includes Cover Page); ● USSGL, Section III: Account Transactions; ● USSGL, Section VII: GTAS Validations and Edits, Closing Edits Detail Report.

Function ID	Federal Financial Management System Function	Requirement ID	DI-Data Input P-Processes DO-Data Output	Federal Financial Management System Requirements	Federal Financial Management System Authoritative Reference
1.1.3	Managing Financial Asset Information	1.1.3.1	DI	Capture federal government asset type (for example, entity, non-entity, governmental, and intragovernmental), category [for example, property, plant, and equipment (PP&E); inventory; seized and forfeited; investments in Treasury securities], and subcategory (for example, general PP&E or heritage PP&E) consistent with The Federal Accounting Standards Advisory Board (FASAB) Handbook of Accounting Standards, and Other Pronouncements, as Amended (FASAB Handbook).	<ul style="list-style-type: none"> ● Statement of Federal Financial Accounting Standard (SFFAS) 1: Accounting for Selected Assets and Liabilities; ● SFFAS 2: Accounting for Direct Loans and Loan Guarantees; ● SFFAS 3: Accounting for Inventory and Related Property; ● SFFAS 6: Accounting for Property, Plant, and Equipment; ● SFFAS 7: Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting; ● SFFAS 10: Accounting for Internal Use Software; ● SFFAS 18: Amendments to Accounting Standards for Direct Loans and Loan Guarantees in SFFAS 2; ● SFFAS 19: Technical Amendments of Accounting Standards for Direct Loans and Loan Guarantees in SFFAS 2; ● SFFAS 23: Eliminating the Category National Defense Property, Plant, and Equipment: Amending SFFAS 6 and 8, and Rescinding SFFAS 11; ● SFFAS 29: Heritage Assets and Stewardship Land; ● SFFAS 38: Accounting for Federal Oil and Gas Resources; ● SFFAS 40: Definitional Changes Related to Deferred Maintenance and Repairs: Amending SFFAS 6, Accounting for Property, Plant, and Equipment; ● SFFAS 42: Deferred Maintenance and Repairs: Amending SFFAS 6, 14, 29, and 32; ● SFFAS 53: Budget and Accrual Reconciliation. ● SFFAS 57: Omnibus Amendments 2019

Function ID	Federal Financial Management System Function	Requirement ID	DI-Data Input P-Processes DO-Data Output	Federal Financial Management System Requirements	Federal Financial Management System Authoritative Reference
		1.1.3.2	P	Determine asset value and provide for adjustments – such as depreciation, impairment, allowance for uncollectible amounts, and subsidy allowance – consistent with FASAB Handbook.	<ul style="list-style-type: none"> ● SFFAS 1: Accounting for Selected Assets and Liabilities; ● SFFAS 2: Accounting for Direct Loans and Loan Guarantees; ● SFFAS 3: Accounting for Inventory and Related Property; ● SFFAS 6: Accounting for Property, Plant, and Equipment; ● SFFAS 10: Accounting for Internal Use Software; ● SFFAS 18: Amendments to Accounting Standards for Direct Loans and Loan Guarantees in SFFAS 2; ● SFFAS 19: Technical Amendments of Accounting Standards for Direct Loans and Loan Guarantees in SFFAS 2; ● SFFAS 23: Eliminating the Category National Defense Property, Plant, and Equipment: Amending SFFAS 6 and 8, and Rescinding SFFAS 11; ● SFFAS 29: Heritage Assets and Stewardship Land; ● SFFAS 38: Accounting for Federal Oil and Gas Resources; ● SFFAS 40: Definitional Changes Related to Deferred Maintenance and Repairs: Amending SFFAS 6, Accounting for Property, Plant, and Equipment; ● SFFAS 42: Deferred Maintenance and Repairs: Amending SFFAS 6, 14, 29, and 32; ● SFFAS 54: Leases: An Amendment of SFFAS 5, Accounting for Liabilities of the Federal Government, and SFFAS 6, Accounting for Property, Plant, and Equipment (Effective for reporting periods beginning after

					September 30, 2023. Early adoption is not permitted)
