## Use Case 100.TRT.L3.02 Group Employee Travel Attending A Conference

**End-to-End Business Process:** 100. Book to Reimburse

### Business Scenario(s) Covered

- L1.5 Conference Travel

### Business Actor(s):

Traveler, Approver(s), Travel Management Center (TMC), Finance Office

### Synopsis

Government traveler profiles are established for three employees traveling to a conference. Except for the en route travel days, breakfast and lunch are provided by the conference host. Travel dates and the conference location are identified, and itinerary options are researched for the trip. Reservations are made for the three travelers using a centrally billed account (CBA) travel card for airfare. A primary traveler is designated for rental car reimbursement. Reservation information is checked for compliance with no issues identified, the reservation and each traveler's passenger name record (PNR) information are provided with the ticketing date. A group travel authorization is prepared, noting the airfare expense charged to the CBA for each traveler. Each traveler's lodging, meals, and miscellaneous expenses are billed on their individually billed travel charge card. Per diem expenses, based on established rates, are estimated for the trip. The group travel authorization information is checked for compliance with no issues identified. The travel authorization is submitted, routed, reviewed, and approved by appropriate officials. The tickets are issued on the ticketing date established by the PNR, and the trip itineraries are generated and provided. After the trip is completed, each traveler prepares a travel voucher to include per diem calculation with conference meal deductions. Expenses such as POV mileage meals, and other miscellaneous expenses charged to each traveler's individually billed travel charge card are noted. The vouchers' information are checked for compliance. The vouchers are submitted, routed, reviewed, and approved by appropriate officials. Payment requests are submitted, identifying amounts to be paid to each traveler and CBA travel card company. Disbursements of the payments are made, and the vouchers are marked paid.

### Assumptions and Dependencies

#### General FIBF

- 1.1 There is no presumption as to which events are executed by which business actor.
- 1.2 There is no presumption as to which events are automated, semi-automated, or manual.
- 1.3 There may or may not be automated (near/real-time or batch) interfaces between service areas/functions/activities and between provider solutions/systems.
- 1.4 All predecessor events required to trigger the Initiating Event have been completed.

#### Business Use Case Specific

- 2.1 Travel budget has been established.
- 2.2 The traveler has an exception to using a Government travel card in the travel personnel profile.
- 2.3 Agency allows use of a traveler's personal credit card for travel expenses.
- 2.4 The reconciliation of the CBA travel card statement and travel vouchers is conducted at a later time.
- 2.5 The CBA travel card account statement cost is paid in the Travel and Fleet Card Reconciliation Process.
- 2.6 The travel documents associated with the trip are not selected for audit.

#### Federal Records Management

- 3.1 In accordance with National Archives General Records Schedules (GRS) and other Federal records management standards, the types of digital objects received or created during TRT events (Business Use Case Inputs or Outputs) that are considered TRT Federal records (ERM.010.010, ERM.010.020) are specified with a superscript (FR).

- 3.2 For each type of TRT Federal record, a retention period is established (ERM.010.030) and, if special circumstances occur such as an order, law, or business justification, a temporary Federal record retention period is changed (ERM.030.040) or a permanent Federal record retention period is extended (ERM.040.040).
- 3.3 During the retention period of a TRT Federal record: appropriate access levels are maintained (ERM.020.010); associated metadata (e.g., record identifier, creator, creation date, security classification, access rights) and an audit trail of changes to Federal record content, metadata, and access level are maintained (ERM.020.020); if a litigation hold is placed, the Federal record is locked down until the litigation hold is lifted to ensure no changes can be made (ERM.020.030); if needed to satisfy a Freedom of Information Act, Congressional, or e-discovery request, the Federal record is made available (ERM.020.040); and if needed because of technology obsolescence, the Federal record is migrated to another repository to serve out its retention period (ERM.020.050).
- 3.4 Once a TRT Federal record has met its record retention period, it is disposed (ERM.030.010, ERM.030.020, ERM.030.030) or transferred to NARA (ERM.040.010, ERM.040.020, ERM.040.030).

#### Initiating Events

New Government employee is requested to attend a conference.
